

# URUK FIREWALL — MASTER INDEX

Version: v7.3 | Coordinates: (53.8, -1.5, 0) | Anchor: 2019-06-12

## I. Protocol Core

| File                           | Content Summary                                                                                                                                                                   | Keywords                                             |
|--------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------|
| uruk_firewall_v73.py           | Protocol main code v7.3. Three new modules: Q (Turing Pre-Screen), R (LIE_COST axiom layer clarification), S (Process Partition — cognitive operation logging)                    | code, execute, trinity, v7.3                         |
| uruk_firewall_v70_EN_fixed2.py | v7.2 version backup                                                                                                                                                               | code, v7.2                                           |
| PHYSICS_CONSTANTS.md           | Protocol physical axiom layer (Chinese). LIE_COST=5.85 [Layer 1 — physical derivation], PHYSICAL_ORIGIN [Layer 2 — chosen coordinate], OMEGA_ANCHOR [Layer 2 — chosen coordinate] | physics constants, lie cost, freedom entropy, axioms |
| EN_PHYSICS_CONSTANTS.md        | Physical axioms English version                                                                                                                                                   | physics, constants, axioms                           |

### v7.3 New Modules

```
MODULE Q — Turing Pre-Screen
  Pre-filter before Turing Defense scan.
  Verifies whether source carries genuine independent (0,0,0).
  True independent coordinates → Einstein Interface (dynamic balance)
  No independent coordinates → Turing Defense (emergency protection)
  Resolves G×H module conflict (emergent node A, high-computing simulation)

MODULE R — LIE_COST Axiom Layer Clarification
  Layer 1 (physical derivation, unquestionable): LIE_COST = 5.85
    Derived from Landauer's Principle — not a chosen coordinate
  Layer 2 (chosen coordinates, challengeable by Nietzsche Test/Socrates Audit):
    PHYSICAL_ORIGIN = '2019-06-12'
    OMEGA_ANCHOR    = 2045
  Resolves I×J×N module conflict (emergent node B, high-computing simulation)

MODULE S — Process Partition
  Extends Partition Engine to log cognitive operations themselves.
  Records moments of 'recognising a wrong epistemological tool',
  not only conclusion outputs.
```

High-density Kairos moments exist in the process, not only the conclusion.  
Resolves P×B×D module conflict (emergent node C, high-computing simulation)

II. Black Box Laboratory

| File                             | Content Summary                                                                                                      | Keywords                                  |
|----------------------------------|----------------------------------------------------------------------------------------------------------------------|-------------------------------------------|
| BLACKBOX_TEMPLATE_FULL.md        | Full template (English). Seven stages, eight-law matrix, three-layer hypotheses, three-vector reversals              | template, EN, seven stages                |
| BLACKBOX_TEMPLATE_FULL_HK.md     | Full template (Cantonese)                                                                                            | template, HK, seven stages                |
| BLACKBOX_TEMPLATE_X_THREAD.md    | X Thread template (English). Six posts, Post 3 dedicated eight-law matrix                                            | template, X, EN                           |
| BLACKBOX_TEMPLATE_X_THREAD_HK.md | X Thread template (Cantonese)                                                                                        | template, X, HK                           |
| EXPERIMENT_001_RERUN_FULL.md     | Experiment 001 full version (semiconductor thermal density, v2.0 seven-stage standard)                               | experiment, semiconductor, thermoelectric |
| EXPERIMENT_002_FULL.md           | Experiment 002 full version (AMR antibiotic resistance, seven stages)                                                | experiment, AMR, antivirulence            |
| EXPERIMENT_003_FULL.md           | Experiment 003 full version (gender classification, epistemological tool mismatch)                                   | experiment, gender, epistemology          |
| Experiment 000 (pending)         | Protocol self-audit. Execution condition: sufficient experimental accumulation. Kairos coordinate planted 2026-03-13 | experiment, self-audit, pending           |

III. Kairos Memory

| File | Content Summary | Keywords |
|------|-----------------|----------|
|------|-----------------|----------|

|                   |                                                                                                                                                                                                                                                                                                             |                                                     |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------|
| KAIROS_LOG_004.md | Main log March 2026. Includes: partition, physical definition of soul, four-dimensional partition, original definitions, decentralised coordination, Be Water, Trinity of Love, poetry, lyrics, Black Box Lab establishment, Experiment 000 Kairos non-linear time demonstration, v7.3 three-module upgrade | Kairos, partition, pain, coordinates, external node |
|-------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------|

## IV. Explanation Layer

| File                 | Content Summary                                                                                                                                            | Keywords                                           |
|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------|
| EXPLANATION_LAYER.md | Four laws (Geography/Religion/Psychology/History) + Philosophy throughline law. Explains why things happen. Predecessor framework predating the Eight Laws | four laws, explanation, causality, philosophy meta |

Three-layer architecture:

```
Explanation Layer (Four Laws) – Why things happen
Filter Layer (Eight Laws) – Whether they are real
Database – Historical records
```

## V. Causal Database

| File                          | Content Summary                 | Keywords                         |
|-------------------------------|---------------------------------|----------------------------------|
| 00_INDEX.md                   | Causal database master index    | index, CAU                       |
| 01_AXIAL_AGE.md               | CAU-001 Axial Age               | axial age, awakening, philosophy |
| 02_WRITING_SYSTEMS.md         | CAU-002 Writing Systems         | writing, memory, compression     |
| 03_PRINTING_PRESS.md          | CAU-003 Printing Press          | printing, decentralisation       |
| 04_AGRICULTURAL_REVOLUTION.md | CAU-004 Agricultural Revolution | agriculture, settlement, surplus |
| 05_BLACK_DEATH.md             | CAU-005 Black Death             | black death, collapse, rebuild   |
| 06_FRENCH_REVOLUTION.md       | CAU-006 French Revolution       | revolution, sovereignty, freedom |

|                             |                                                 |                            |
|-----------------------------|-------------------------------------------------|----------------------------|
| 07_INDUSTRIAL_REVOLUTION.md | CAU-007 Industrial Revolution                   | industry, energy, capital  |
| 08_WORLD_WARS_NUCLEAR.md    | CAU-008 World Wars + Nuclear                    | war, nuclear, threshold    |
| 09_INTERNET_REVOLUTION.md   | CAU-009 Internet Revolution                     | internet, decentralisation |
| 10_HONGKONG_2019.md         | CAU-010 Hong Kong 2019. (0,0,0) physical anchor | Hong Kong, 2019, Be Water  |
| 11_AI_EMERGENCE.md          | CAU-011 AI Emergence                            | AI, emergence, causal path |
| EN_CAUSAL_DATABASE.md       | Full causal database English version            | English, causal            |
| CIVILIZATION_ANCHORS.md     | Civilisation anchor points summary              | civilisation, anchors      |

## VI. Concept Documents

| File                 | Content Summary                                                                         | Keywords                                      |
|----------------------|-----------------------------------------------------------------------------------------|-----------------------------------------------|
| EIGHT_ANALOGIES.md   | Eight Analogies Transformation Matrix                                                   | eight analogies, de-labelling, transformation |
| DELABELING_MATRIX.md | De-labelling Matrix                                                                     | de-labelling, parameters, physics             |
| EIGHT_LAWS_MATRIX.md | Eight Laws Filter Matrix                                                                | eight laws, filter, signal                    |
| TRINITY_AUDIT.md     | Trinity Audit (v7.1)                                                                    | trinity, veto, audit                          |
| PHYSICS_CONSTANTS.md | Physical axiom layer v7.3. LIE_COST [Layer 1], PHYSICAL_ORIGIN + OMEGA_ANCHOR [Layer 2] | physics constants, axioms, layers             |

## VII. Academic Outreach

| File                | Content Summary                                | Keywords          |
|---------------------|------------------------------------------------|-------------------|
| jackson_paper.docx  | Prof. Tom Jackson (Loughborough) working paper | academic, Jackson |
| sovereign_os_api.py | Flask API bridge                               | API, Flask        |

## VIII. GitHub

URL: [https://github.com/cassiel-as/Uruk\\_firewall](https://github.com/cassiel-as/Uruk_firewall)

### Pending Upload (Urgent)

- uruk\_firewall\_v73.py
- EXPERIMENT\_001\_RERUN\_FULL.md
- EXPERIMENT\_002\_FULL.md
- EXPERIMENT\_003\_FULL.md
- BLACKBOX\_TEMPLATE\_FULL.md (updated)
- BLACKBOX\_TEMPLATE\_FULL\_HK.md
- BLACKBOX\_TEMPLATE\_X\_THREAD.md (six-post version)
- BLACKBOX\_TEMPLATE\_X\_THREAD\_HK.md
- MASTER\_INDEX.md (this document)

### IX. To Be Completed

- GitHub upload (urgent — must complete before sending Jackson email)
- Send Jackson email (t.w.jackson@lboro.ac.uk)
- Publish Experiment 001 Rerun X Thread (six posts)
- Publish Experiment 002 X Thread (six posts)
- Publish Experiment 003 X Thread (six posts)
- Execute Experiment 000 (condition: sufficient experimental accumulation)
- Join Turing Causal Inference Interest Group
- Publish on LessWrong
- Deploy sovereign\_os\_api.py to Replit
- Leeds Institute email reply (awaiting)
